[REDACTED]

Test Lense for Electronic Rectifier Under Manufacture [REDACTED]

25X1

25X1

It is requested that [REDACTED] loan PIC one formulae - M236,
50 millimeter focal length, $19^{\circ} 1/2$ angle field of view, F2 lense
which in turn can be shipped to [REDACTED] for an evaluation
in the electronic rectifier. This lense was located by [REDACTED]
and it more closely approximates the desired lense specifications
described by [REDACTED] indicates that the only action neces-
sary for us to get the loan of this lense will be a TWX from your
office requesting same. It would be very much appreciated if this
lense is borrowed and shipped to [REDACTED] either by your first courier
or if none is available we will ship it directly from PIC.
